PROJECTS

Face Recognition Brain ○

ReactJS, Clarifai API, NodeJS, ExpressJS, MongoDB, Vercel, Render

📅 July 2023

- The purpose of this application is to detect and recognize faces within images using the advanced face recognition capabilities provided by the Clarifai API.
- The application utilizes the Clarifai API's face detection model to accurately identify and locate faces within the provided images, providing precise bounding box coordinates for each detected face.

NewsMonkey ○

Html,CSS,Bootstrap,Javascript,ReactJS,NewsAPI

📅 June 2023

- NewsMonkey is a web application that provides users with the latest news from around the world
- The app utilizes the NewsAPI to gather news articles.
- The key features of NewsMonkey include advanced filtering options and infinite scrolling functionality, which enable users to seamlessly browse through a virtually endless stream of news articles.

Password Generator ○

Html, CSS, Javascript

📅 July 2023

- The Password Generator is a web-based application that allows users to generate strong and secure passwords.
- It provides an easy-to-use interface where users can customize various parameters to create passwords that meet their specific requirements.

To Do List ○

Html, CSS, Bootstrap,Javascript, ReactJS

📅 May 2023

- The To-Do List Project is a comprehensive task management application designed to help individuals and teams organize, prioritize, and track their daily activities efficiently.
- The application offers an intuitive and visually appealing user interface, allowing users to navigate through their tasks seamlessly.
